

Project / Sophia Apartments
Location / 544 High Street, Northcote
Floor Count / 5

*Pre-Fabricated
Hob Formwork.
Easier, Smarter & Faster*

IN THE CUSTOMER'S WORDS...

"When we are asked to supply hobs to any of our concrete construction projects, we only use SBS pre-fabricated products.

The quality and huge range in sizes means that we can be confident in providing a finished product for the builder that is second to none.

When quality and service is spot on...why go anywhere else?"

...as a rule we are probably doing it in half the time that it would take to do it with conventional formwork.

You also end up with a hell of a lot of strips of ply that get thrown out at the end of a job.

The other good thing about Smart hobs is that they don't damage the slab on the outside of the hob because they are held down internally. Conventional formwork always leaves nail holes in the slab when its stripped.

We can do Smart hobs in half the time with half the man power.

...It's a good product and we love it."
