THINGS 2 KNOW

25 Most Commonly Stolen Passwords

Presented to you by Hierl Insurance Inc.

How clever is your password? If it's on the list below, your password is just as easily stolen as it is remembered. Protect yourself by making sure you're not using one of the top 25 most commonly stolen passwords of 2017, as determined by IT security firm SplashData.

To create a more secure password, make sure you are not relying only on numbers, and try to avoid simple keyboard patterns. You may also want to avoid easy-to-find information such as birthdays, favorite sports teams and addresses. Attempt to create a password that is eight or more characters long, and avoid using the same password for multiple access points.
